AirClean

LECHUZA AIRCLEAN

THE HUMIDIFIER THAT BRINGS THE FRESHNESS OF NATURE INTO YOUR HOME

Humidity levels in most homes and offices are often too low, especially during the heating period from October to April. One consequence of this is dryness of the mucous membranes which leads to an increased susceptibility to infectious illnesses.

Wood flooring and high-quality wood instruments also require stable air humidity levels otherwise they can become brittle and easily damaged.

LECHUZA AIRCLEAN – AIR HUMIDIFIER AND PURIFIER IN ONE UNIT

No other humidifier works as discreetly as LECHUZA AirClean: Concealed within a designer LECHUZA planter, AirClean humidifies and purifies air and uses a patented plant liner to simultaneously nourish a beautiful houseplant, bringing a healthy piece of nature into your home in both summer and winter while also providing quality air.

THE NEW AIRCLEAN HAS COUNTLESS BENEFITS:

- Air purifier and planter together in a single unit
- Large water reservoir (approx. 28 l, 7 gallons)
- Only requires refilling every 4–10 days
- High humidification output (up to 7 liters a day)
- Low energy consumption
- No additional chemicals needed
- Reduces the amount of dust particles in air
- Tested by respected institutes

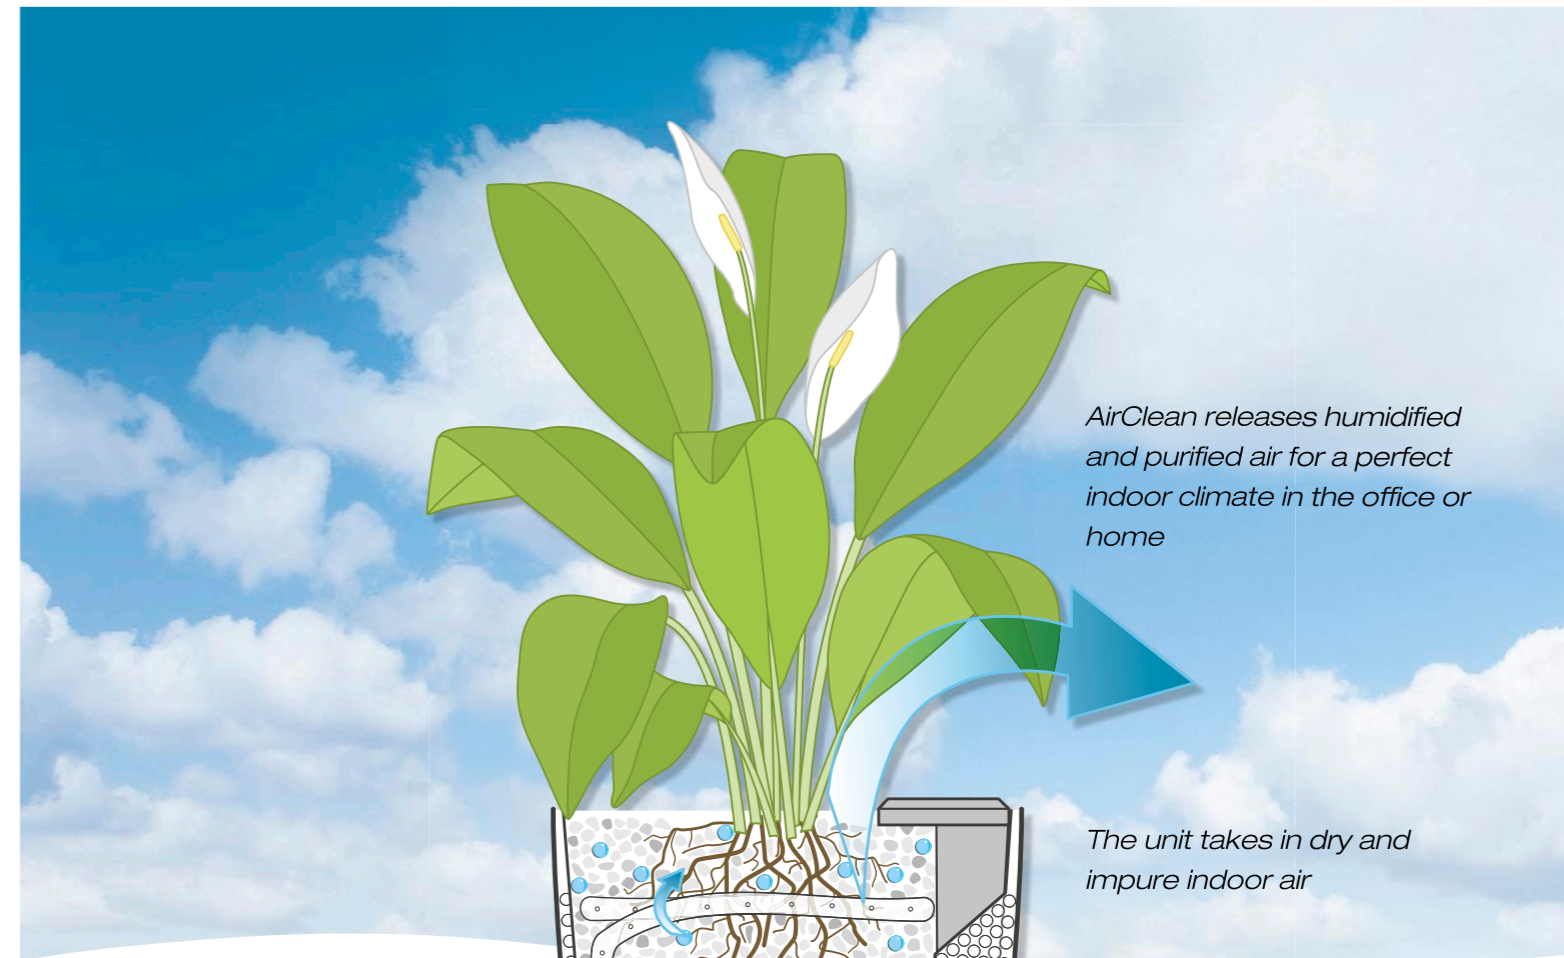

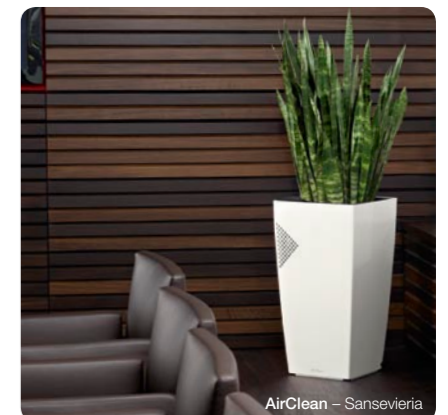

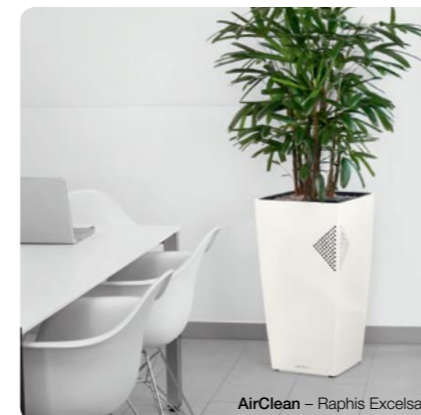

AirClean is especially suitable for hydroponic plants in pots with a diameter of 6 to 8 in.

FACTS & FIGURES

AirClean dimensions	h: 30 inch, w: 16 inch, d: 16 inch
Available planter colors	charcoal metallic, white high-gloss
Airflow rate	approx. 1,400–3,500 cu ft (per AirClean)
Humidification	up to 7 l (2 gal) / day (at 77 °F, 30 % relative humidity)
Sound emission	level 1 approx. 33 db (approx. 49 db at the highest level)
Water reservoir	approx. 28 l (7 gal)

AirClean releases humidified and purified air for a perfect indoor climate in the office or home

The unit takes in dry and impure indoor air

LECHUZA AirClean filters out the majority of respiratory contaminants in air and captures them in pellets.

The result: excellent air quality in your home.
