## High-Quality Finishes

**With the original LECHUZA  
sub-irrigation system**

*Lechuza*®

Self-Watering Planters

## How do LECHUZA planters stand above the rest?

Attractive planters are a dime a dozen. But do they also meet your plant's needs? LECHUZA planters do. Plants virtually take care of themselves.

### **The sub-irrigation system ensures superb plant growth**

LECHUZA turns plant care into child's play: Simply fill the water reservoir integrated in the bottom of the planter once. Then let LECHUZA tend to your plants for up to 12 weeks\*, without the need for further watering.

### **No waterlogging - even when used outdoors**

The original LECHUZA sub-irrigation system is suitable both for plants that have high water needs as well as for plants that require significantly less water, such as succulents (i.e. cacti). Thanks to an overflow function integrated in the bottom of the planter, LECHUZA provides potted plants with the perfect amount of water - even when used outdoors. When the drain plug is removed, excess rainwater runs off and the plant doesn't become waterlogged.

### **Did you know?**

Most houseplants are overwatered. LECHUZA, however, always ensures a well-balanced water supply to the roots and thus, guarantees fantastic plant growth.

\* depending on planter size, plant, and location.

reddot design award  
best of the best 2008

Fits on any windowsill:  
DELTA 20 (16x6x7 inches)

DELTA 20 – Curcuma longa

DELTA 15 – Vriesea spec.

DELTA 30 and 40: With interchangeable plant liner

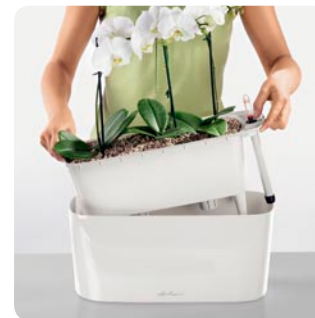

DELTA 40 – Ficus benjamina 'Exotica'

## DELTA

### Award-winning design for discerning tastes.

The successful DELTA series offers unmatched freedom in creative interior decoration. Since its introduction, DELTA has already earned the respect of many admirers and won international awards for its exceptional design. But that's no reason for us to rest on our laurels. With our new, innovative DELTA 20 planter (plant volume 16 x 6 x 7 in) we have added another intelligent solution to this successful series. All-new DELTA 20 was especially designed for long windowsills or other surfaces such as sideboards and countertops too narrow to hold conventional flowerpots.

For the new windowsill planter we integrated the LECHUZA sub-irrigation set directly into the plant liner, making planting simpler than ever and guaranteeing fantastic plant growth.

**Practical:**  
The LECHUZA sub-irrigation system is already integrated in the DELTA 20 plant liner

All-new: CUBICO 22  
9x9x16 inches

CUBICO 22 – Phalaenopsis Hybride

## CUBICO and CARARO

For those who clearly follow their own personal style.

The clear design of the elegant CUBICO column opens up unlimited possibilities for creative plant lovers as a floor or table planter for both exciting and unique arrangements. And your imagination will thrive with CARARO's 30 inches-wide planting area. This elegant trough shape is ideal for partitioning or sectioning a room.

Both planters are just as attractive outdoors as they are indoors, and with the original LECHUZA sub-irrigation system watering becomes a no-brainer.

CUBICO 40 – Spathiphyllum sensation

CUBICO 22, 30, 40: With interchangeable plant liner

CUBICO 50 – Spathiphyllum sensation

Adds boundaries to your room, not your imagination: Two hidden rollers make CARARO a mobile room divider.

CARARO – Dracaena 'White Stripe'

CARARO – Calathea

CARARO – Sansevieria cylindrica 'Skyline'

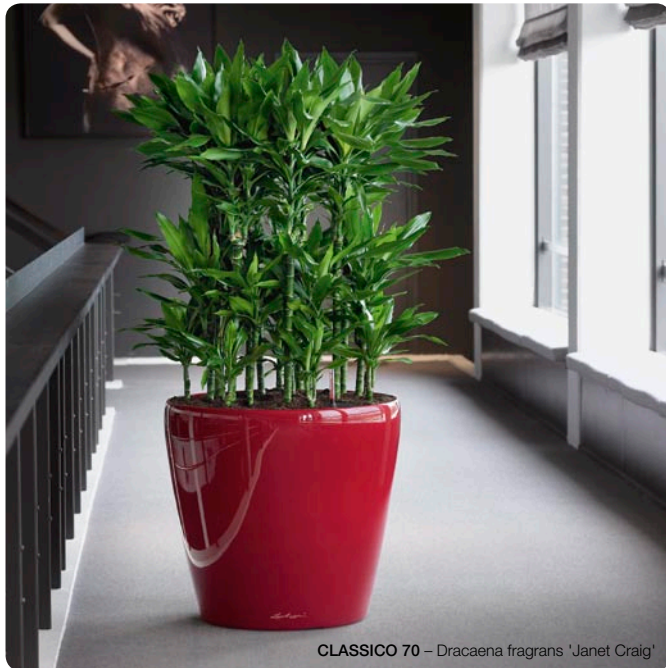

CLASSICO 50 – Alocasia calidora

## CLASSICO and QUADRO Timeless style

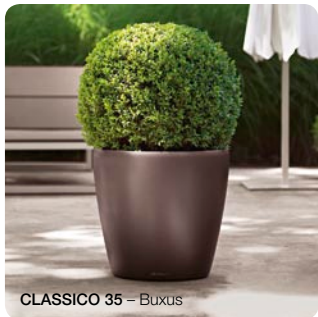

Style is the art of standing out without showing off. CLASSICO and QUADRO are masters of this art. Two planters whose originality comes from their sheer elegance that allows them to fit perfectly in any surrounding. And they do this with ease, even when fully planted thanks to the LECHUZA coaster available from planter size 43 and up for easy movement to any location both indoors and outdoors. The shatter-resistant plastic material and glossy or metallic-color finished surfaces create colorful accents no matter what the weather. In fact, the ingenious overflow function in the bottom of the planter prevents overwatering and damaging waterlogging at the roots when used outside.

Coasters make CLASSICO 43–70 a mobile planter – and are hidden below.

CLASSICO 70 – Dracaena fragrans 'Janet Craig'

CLASSICO 35 – Buxus

QUADRO 28 – Zamioiculus zamiifolia

Coasters make QUADRO 43 and 50 mobile.

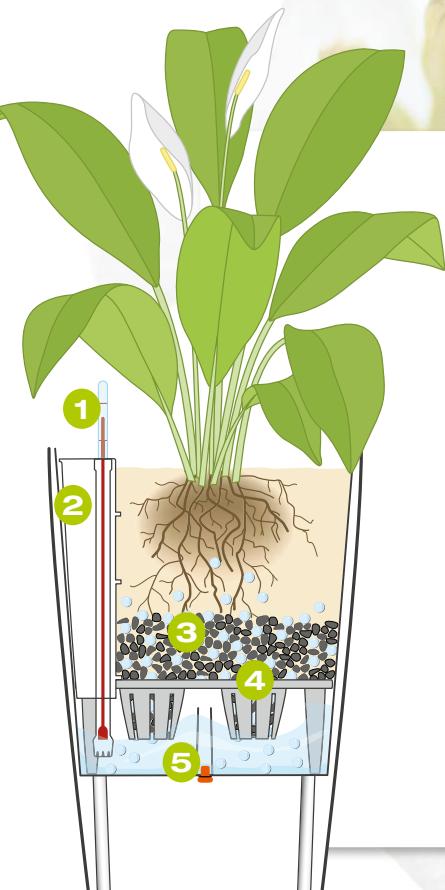

QUADRO 28 – Calathea 'Medaillon'

# LECHUZA self-watering planters care for your plants

The secret to beautiful plants is found on the inside of every LECHUZA planter: the LECHUZA sub-irrigation system

Whether you are away for a few days, or simply can't find the time in your busy schedule to take care of your plants – the LECHUZA self-watering planters take care of your plants for you (up to 12 weeks depending on planter size), providing your pot plants with the right amount of water and nutrients for optimum growth. The principle is simple: Just fill the LECHUZA water reservoir completely and your plants will “nurture themselves” for up to 12 weeks.

## The original LECHUZA sub-irrigation system

Your plants flourish naturally with the integrated sub-irrigation system:

- 1 Water level indicator**  
The water level is always visible
- 2 Water supply shaft**  
Makes adding water and liquid fertilizer easy
- 3 LECHUZA PON as a separating layer**  
Perfectly controls the water supply to the plants
- 4 Separator**  
Forms the water reservoir in the bottom of the planter
- 5 Drain plug**  
Is removed to allow excess rainwater to drain when used outdoors.
